

Northern Pulse Growers Association

# Legislative Action Fund

*One Voice. Unified. Strong.*

The Northern Pulse Growers Association (NPGA) in partnership with the U.S.A. Dry Pea & Lentil Council are committed to improving and protecting the pulse industry. These organizations provide a unified and strong voice on crucial legislative issues such as farm program policy, disaster legislation, crop insurance and market development. The USA Dry Pea & Lentil Council has contracted with the respected lobbying firm, Gordley and Associates to serve as the pulse industry representative in Washington, D.C. Gordley and Associates provides the pulse industry with the expertise and initiative to work on the major issues facing pulse growers in Montana, North Dakota and the United States.

In the past, Legislative Action Fund contributions have been used to secure the pulse loan program, federal marketing funds and research funding. Your generous contributions to the Legislative Action Fund help to support industry interests and ensure involvement in the political decision making process. Membership dues are used to fund issues such as research, market development and grower education. Unfortunately, there are not adequate funds remaining after these expenses to cover the cost of retaining our Washington D.C. representation. The NPGA is asking for your additional support through Legislative Action Fund contributions. Your contribution is an investment in the future of the pulse industry.

We thank you for your support. If you have any questions, please call the NPGA office at 701-222-0128.
